List of Contents

NUMBER 1

Editorial	iii	
A. Morecki	1	Past, present and future of IFToMM
Miomir Vukobratović and **Branislav Borovac**	11	Accuracy of the robot positioning and orientation assessed via its manufacturing tolerances
A. C. Rao	33	Topological characteristics of linkage mechanisms with particular reference to platform-type robots
G. Wesley Blankenship and **Rajendra Singh**	43	A new gear mesh interface dynamic model to predict multi-dimensional force coupling and excitation
Sunil Kumar Agrawal and **Shravan Shirumalla**	59	Planning motions of a dual-arm free-floating manipulator keeping the base inertially fixed
Joel W. Burdick	71	A classification of 3R regional manipulator singularities and geometries
K. Bauer und **J. Volmer**	91	Synthese des Kettenkurvenschrittgetriebes
Tomasz Kiczkowiak	101	Simplified mathematical model of the pneumatic high speed machine drive
J. A. Snyman, P. S. Heyns and **P. J. Vermeulen**	109	Vibration isolation of a mounted engine through optimization
Chih-Yi Cheng and **Yuyi Lin**	119	Improving dynamic performance of the Geneva mechanism using non-linear spring elements
Zhang Xianmin, Shen Yunwen, Liu Hongzhao and **Cao Weiqing**	131	Optimal design of flexible mechanisms with frequency constraints
L. Cveticanin	141	Dynamic behavior of the lifting crane mechanism
Dimitrios M. Emiris and **Vassilios D. Tourassis**	153	Analysis of the effects of manufacturing errors on the accuracy of dual-elbow and elbow manipulators
Book Reviews		
Larry L. Howell and **Ashok Midha**	167	Classical and Modern Mechanisms for Engineers and Inventors. By P. W. Jensen
Larry L. Howell and **Ashok Midha**	167	Theory of Mechanisms and Machines. By A. Ghosh and A. K. Mallik

NUMBER 2

Ahmad A. Smaili	169	Robomechs: a new class of linkage arms for multi-task applications
K. H. Hunt and **I. A. Parkin**	177	Finite displacements of points, planes, and lines via screw theory
J. D. Vangsness, M. A. Fugelso and **R. R. Lindeke**	193	Closed form solution of kinematic equations for the mechanism of a twist drill grinding machine
Michel Fayet	201	Mécanismes multi-boucles—I. Détermination des espaces de torseurs cinématiques dans un mécanisme multi-boucles quelconque
Michel Fayet et **Pierre Bonnet**	219	Mécanismes multi-boucles—II. Processus de détermination du rang des équations de liaison. Distribution des mobilités
Michel Fayet	233	Mécanismes multi-boucles—III. Hyperstatisme au sens de la dynamique et au sens de la cinématique-dualité
Sam D. Haddad	253	Theoretical treatment of piston motion in I.C. piston engine for the prediction of piston slap excitation
Sam D. Haddad and **Kek-Tjen Tjan**	271	An analytical study of offset piston and crankshaft designs and the effect of oil film on piston slap excitation in a diesel engine
E. H. El-Dannanh	285	Flexural vibrational behaviour of an elastic linkage containing a transverse crack
Zhongming Liang	299	Computer-aided graphical design of spatial mechanisms
Shu Xiao-long	313	Determination of load sharing factor for planetary gearing with small tooth number difference

NUMBER 3

G. Wesley Blankenship and **Rajendra Singh**	323	Dynamic force transmissibility in helical gear pairs
N. S. Ashton, M. M. Charif and **J. K. Davidson**	341	Generic features for resolving the redundancy in one class of seven-jointed robotic workcells
Aleksandar D. Rodić and **Miomir K. Vukobratović**	363	Contribution to the controller design in tasks of robotic deburring
Wen-Yeuan Chung and **Kenneth J. Waldron**	383	Wrench reconstruction by using a six-axis force sensor

Leila Notash and **Ron P. Podhorodeski**	391	On the forward displacement problem of three-branch parallel manipulators
S.-T. Chiou and **R.-J. Tsai**	405	The ideal shaft locations of three-rotating-mass balancers for spatial mechanisms
Yusuf Yaylı and **Bahaddin Bükcü**	417	Homothetic motions at E^8 with Cayley numbers
Y. B. Zhou, R. O. Buchal and **R. G. Fenton**	421	Analysis of the general 4R and 5R robots using a vector algebraic approach
Claude Gosselin, Louis Cloutier and **Q. D. Nguyen**	433	A general formulation for the calculation of the load sharing and transmission error under load of spiral bevel and hypoid gears
Yue-Qing Yu	451	Active design of a flexible space mechanism with optimal characteristics
R. P. Voinea and **I. V. Stroe**	461	A general method for kinematic pairs synthesis
Henry T. Wu, Neel K. Mani and **Hashem Ashrafiuon**	471	Selection of modal basis for flexible bodies of mechanical systems
John J. Coy	491	A Celebration of the Eighty Years Milestone: Dr Faydor L. Litvin
Book Review **T. E. Shoup**	493	Gear Geometry and Applied Theory. By Faydor L. Litvin
Erratum	I	

NUMBER 4

Hamza Diken	495	Effect of mass balancing on the actuator torques of a manipulator
Javier Vallejo, Rafael Avilés, Alfonso Hernández and **Enrique Amezua**	501	Nonlinear optimization of planar linkages for kinematic syntheses
Miomir Vukobratović and **Radoslav Stojić**	519	Historical perspective of hybrid control in robotics: beginnings, evolution, criticism and trends
Jaouad Sefrioui and **Clément M. Gosselin**	533	On the quadratic nature of the singularity curves of planar three-degree-of-freedom parallel manipulators
Nestor A. Karolev and **Peter W. Gold**	553	Load distribution of timing belt drives transmitting variable torques
J. R. Singh and **J. Rastegar**	569	Optimal synthesis of robot manipulators based on global kinematic parameters

L. Cveticanin	581	Resonant vibrations of nonlinear rotors
Zhang Shemin and **Chen Jihong**	589	The optimum balance of shaking force and shaking moment of linkage
P. Kaliafetis and **Th. Costopoulos**	599	Modelling and simulation of an axial piston variable displacement pump with pressure control
Li Zhe	613	Chaotic vibration sieve
V. Ramamurti, D. A. Subramani and **K. Sridhara**	619	Free vibration analysis of a turbocharger centrifugal compressor impeller
K. H. Low and **Michael W. S. Lau**	629	Experimental investigation of the boundary condition of slewing beams using a high-speed camera system

NUMBER 5

Li-ju Xu, Shou-wen Fan and **Yong Chen**	645	A numeric–symbolic approach for kinematics and dynamics of robotic manipulators
S. Mitsi, K.-D. Bouzakis and **G. Mansour**	653	Optimization of robot links motion in inverse kinematics solution considering collision avoidance and joint limits
H. R. Mohammadi Daniali, P. J. Zsombor-Murray and **J. Angeles**	665	Singularity analysis of planar parallel manipulators
J. Eddie Baker	679	On testing for gross mobility of new kinematic loops with screw system algebra
Yüksel Yilmaz and **Hikmet Kocabas**	695	The vibration of disc cam mechanism
Y. B. Zhou, R. O. Buchal, R. G. Fenton and **F. R. Tan**	705	Kinematic analysis of certain spatial mechanisms containing higher pairs
V. Jivkov and **I. Valtchev**	721	Unstationary movement of an electric motor-driven machine
Adolf Karger	727	Classification of robot-manipulators with only singular configurations
Jian Tao and **J. P. Sadler**	737	Constant speed control of a motor driven mechanism system
Charles Dhanaraj and **Anand M. Sharan**	749	Efficient modeling of rigid link robot dynamic problems with friction
Erratum	I	

NUMBER 6

J. C. Faugère and **D. Lazard**	765	Combinatorial classes of parallel manipulators
Chung-Biau Tsay, Jiun-Wen Jeng and **Hong-Sheng Feng**	777	A mathematical model of the ZE-type worm gear set
Jen-Yu Liu	791	On the surface geometric error of line generated helicoids machined by rotating tools
Larry L. Howell and **Ashok Midha**	801	The effects of a compliant workpiece on the input/output characteristics of rigid-link toggle mechanisms
Gao Feng, Zhang Xiao-Qiu, Zhao Yong-Sheng and **Zu Wen-Buo**	811	Distribution of some properties in physical model of the solution space of 2-DOF parallel planar manipulators
Jeong-Du Kim and **Soo-Ryong Nam**	819	An improvement of positioning accuracy by use of piezoelectric voltage in piezoelectric driven micropositioning system simulation
W. Gutkowski, J. Bauer, Z. Iwanow and **J. Putresza**	829	Multi-arm mechanism design minimizing hinge reactions between arms
Michał Hać	837	Dynamics of flexible mechanisms with mutual dependence between rigid body motion and longitudinal deformation of links
M. Vincze, H. Gander and **J. P. Prenninger**	849	A model of tumbling to improve robot accuracy
S. Kemal Ider	861	Open-loop flexibility control in multibody systems dynamics
Özgür Turhan	871	Dynamic stability of four-bar and slider–crank mechanisms with elastic coupler
S. J. Lorenc, M. M. Stanišić and **A. S. Hall Jr.**	883	Application of instantaneous invariants to the path tracking control problem of planar two degree-of-freedom systems: a singularity-free mapping of trajectory geometry
Elon Rimon and **Joel W. Burdick**	897	A configuration space analysis of bodies in contact—I. 1st order mobility
Elon Rimon and **Joel W. Burdick**	913	A configuration space analysis of bodies in contact—II. 2nd order mobility
A. A. Olędzki	929	Modeling and simulation of self-locking drives

NUMBER 7

GRAPHS AND MECHANICS

FIRST INTERNATIONAL CONFERENCE

v Editorial

Krzysztof P. Arczewski 943 Π-matrix—its definition, interpretation and application

G. Baciu and **H. K. Kesavan** 953 Graph-theoretic modeling of particle-mass and constrained rigid body systems

Andrzej Buchacz 969 Modelling, synthesis and analysis of bar systems characterized by a cascade structure represented by graphs

Edward Cichowski 987 Technical hazards—a model of purposeful safety techniques

T. H. Davies 991 Couplings, coupling networks and their graphs

T. H. Davies 1001 Circuit actions attributable to active couplings

Marek Golubiewski 1013 Directed graphs as the generators of the whole set of gerber beams

Cezary Orlikowski 1019 Symbolic analysis of bond graphs by application of the Coates rule

Andrzej Pikoń and **Józef Wojnarowski** 1027 Application of structural numbers to generating the characteristics of mechanical systems

Tadeusz Szkodny 1039 Forward and inverse kinematics of IRb-6 manipulator

Tadeusz Szkodny 1057 Dynamics of industrial robot manipulators

Jerzy Świder 1073 Matrix hybrid graphs as models of complex vibrating mechanical systems

Józef Wojnarowski 1099 Graph representation of mechanical systems

NUMBER 8

iii In Memoriam

F. Xi 1113 Trajectory tracking of a spatial flexible link manipulator using an inverse dynamics method

Subir Kumar Saha, Jorge Angeles and **John Dareovich** 1127 The design of kinematically isotropic rolling robots with omnidirectional wheels

Shiva Shankar and **Amitabh Saraf**	1139	Singularities in mechanisms—I. The local trajectory tracking problem
Kan Cui, Imtiaz Haque and **Mukundh Thirumalai**	1149	On configurations of symbolic equations of motion for rigid multibody systems
Yi Zhang, F. L. Litvin and **R. F. Handschuh**	1171	Computerized design of low-noise face-milled spiral bevel gears
P. S. Donelan and **C. P. Scott**	1179	Real inflections of hinged planar four-bar coupler curves
C. R. Tischler, A. E. Samuel and **K. H. Hunt**	1193	Kinematic chains for robot hands—I. Orderly number-synthesis
C. R. Tischler, A. E. Samuel and **K. H. Hunt**	1217	Kinematic chains for robot hands—II. Kinematic constraints, classification, connectivity, and actuation
Jianhua Pan, J. K. Mills and **J. Van de Vegte**	1241	Manipulator control design using a nonparametric method
J. Volmer	1255	Mechanismen für die gleichmässige Teilung der Ellipse
H. Y. Kim and **D. A. Streit**	1269	Configuration dependent stiffness of the PUMA 560 manipulator: analytical and experimental results
Göran Gerbert and **Jacques de Maré**	1279	Tension distribution in multiple V-belt drives
Carlo Innocenti	1295	Polynomial solution to the position analysis of the 7-link Assur kinematic chain with one quaternary link
Technical Note		
Lyndon O. Barton	1305	A new graphical technique for solving the Euler–Savary equation
